

## Suffolk Student Day

200 secondary school pupils from Suffolk attended the annual Food and Farming Student Day at Hollow Trees Farm earlier this year. The event - now in its second year - looked to recruit the agricultural workforce of the future by demonstrating the diverse and rewarding career opportunities on offer within the sector. Ambassadors from the agricultural industry were on hand to interact with the school groups. Students learnt about topics including crops, livestock and conservation before the day ended with an engaging game show style interactive quiz.

The event was sponsored by the Chadacre Agricultural Trust and organised jointly between Otley College, Suffolk Education Business Partnership and Suffolk Agricultural Association.

## New primary resources!

An exciting new resource funded by AHDB - DairyCo and developed by The British Nutrition Foundation is being developed and will comprise of 6 learning journeys involving

## CRB Disclosures

If you are an organisation wishing to use Criminal Records Bureau (CRB) checks as part of your recruitment or appointment processes, FACE may be able to help you by supplying the necessary forms and guidance. Our charges are very competitive: only £20 per application for non-members and £15 for FACE members. (In addition the CRB makes a charge of £36 for all applicants except volunteers).

If we can help you with CRB Disclosures, please telephone 024 7685 3089 or email [janet@face-online.org.uk](mailto:janet@face-online.org.uk)

## Sponsorship opportunity!

FACE would be pleased to hear from any organisation which would be interested in sponsoring a future edition of this newsletter. Equally, we are happy to talk about other ideas such as sponsorship of website sections or of seminars. Let us know your thoughts!

4 characters. The resource will help children discover more about farming information, healthy eating and cooking. Related resources will support cross-curricular learning. This resource will be launched in early 2011. If you are interested in trialling some of these resources in Autumn 2010 email [k.ralph@nutrition.org.uk](mailto:k.ralph@nutrition.org.uk)

## Lackham Forest School Success

People from a range of backgrounds completed the 4-day Level 3 Forest School course at Lackham Park, part of Wiltshire College Lackham.

During the course pupils from Lacock Primary School came to the forest to enjoy mud workshops and make nature chimes amongst other activities.

## Daring enough to trial the new dairy case studies?

Several case studies are now under development for KS3/4 students and will include teaching resources to explore dairy farming including sustainability and food production and processing. If you are a secondary school interested in trialling these resources, please contact Michelle Rowcliffe at [m.rowcliffe@nutrition.org.uk](mailto:m.rowcliffe@nutrition.org.uk)

FACE, Arthur Rank Centre, Stoneleigh Park, Warwickshire, CV8 2LG

FACE helps young people learn more about food and farming in a sustainable countryside.  
FACE is supported by the Royal Agricultural Society of England, the National Farmers' Union and its members.

# ABOUT FACE

## The newsletter of Farming And Countryside Education

Autumn 2010 Issue 19

When the government announced a review of vocational education, Michael Gove said how much he dislikes the 'v' word and prefers 'practical/technical education' and favours combining practical and academic study to ensure a well-rounded approach that closes no doors.

FACE welcomes the review and hopes that it does open up more doors for students. However, whatever results from the review

there is still much to be done by the sector. The food and farming sector needs more recruits of better quality and this is a challenge which the industry must face up to. This has to start in the schools where decisions are made about the qualifications they will take and the careers they would like to enter.

Are young people aware of the many rewarding job opportunities on offer?

Do they begin to learn about the industry even at primary school, alongside finding out about jobs in the police force, the building trade or the teaching profession? Can secondary students find experience in the farming industry?

The nature of whatever qualifications the government approves is not the issue. The sector itself has to take action and the sooner the better.

**In this edition...** there are numerous examples of farms, agricultural societies and land based colleges working to inspire young people about careers in the industry.

## FACE Farm Membership growing!

FACE is delighted that an increasing number of farmers have opted to take up membership of FACE. We now have almost 70 farm members who are attracted by FACE's offer to provide educational help and expertise via its network of regional co-ordinators. Farm members are invited to seminars at which costs are subsidised and can access

reduced rates for CRB applications. If you would like to find out more about joining us, please contact enquiries@face-online.org.uk or ring 024 7685 8261

## Bayer/FACE Awards 2010

The 2010 Bayer/FACE Awards were presented at The Tower of London with over 100 guests including those from industry, retailers, distributors and educationalists. Special guest was Jim Paice MP, Minister of State for Food & Farming, who presented each of the winners with their prizes.

The winners were as follows:

**Access Award:** Cliff Marriott from Rushall Farm near Bradfield in Berkshire

**Biodiversity Award:** Julia Hawley from Hall Farm near Brentingby in Leicestershire

**Countryside Careers Award:** Tim Papworth from Lodge Farm near Felmingham in Norfolk

**Farm to the Classroom Award:** Alison Mercer from Acorn Farm in Kirkby

**Innovative Learning Award:** Eira Edwards from Hendre Ifan Goch Farm near Bridgend

**The Overall Winner was Rushall Farm**

An award was presented for the first time to an Outstanding Individual. The award recipient, Ian Egginton-Metters, is Assistant Chief Executive of the Federation of City Farms and Community Gardens based in Bristol. The award was given to Ian for his tireless work in helping to develop outdoor visits.

## Devon and Cornwall visits

Over the last year Duchy College, Stoke Climsland has been involved in supporting FACE in Cornwall and Devon to help primary school children to experience the natural environment and discover more about country life.

Area Co-ordinator for FACE, Miranda Murray, gave advice and linked schools with appropriate Access Farms.

Children, teachers and accompanying parents all greatly enjoyed the visits which included activities such as meeting and finding out about the sheep, lambs, pigs and cattle, pond dipping, exploring spoils, clay and woodlands. Getting dirty and "hands on" involvement was a big part of the overall learning experience! Many of the schools have decided to do "follow up" later on in the year to see how things change depending on the seasons.

## Faster pasta!

The FACE team attended the Warwickshire Rural Hub Festival of the Harvest at Stoneleigh Park. West Midlands FACE co-ordinator Brian Hainsworth explained to almost 500 children how to make pasta and where those important ingredients came from. Other exhibitors showed the children how to grow salads, what goes to make a delicious burger, how important worms are to soil health and a multitude of other fascinating facts!

## Business of Farming Student Day

Holt Farmers Club's annual event for 6th formers goes from strength to strength! This year over 500 students – studying a range of A level subjects such as Business, Economics, Biology and Geography - were met at Hall Farm, Wickmere in North Norfolk by a team of farmers. Each group, led by a farmer, walked round the site and at different stands heard from local experts about aspects of the modern agricultural industry. There was plenty of opportunity for questions and discussion. Easton College staff gave information about higher education and training opportunities. The FACE team joined in to learn how this excellent

event was organised. Before the buses left everyone was treated to a hog roast provided by a local farmer, and this provided a delicious example of the ways in which farmers are diversifying to develop their businesses.

## FACE Annual Meeting

This year's annual meeting was generously hosted by Waitrose. Members gathered in the picturesque village of Longstock in Hampshire to hear from Malcolm Crabtree, the Managing Director of the estate, about the history of Leckford, the Waitrose farm. They also learnt about FACE's progress during the year; and witnessed accounts from partners of the benefits of working with FACE. Sir Don Curry, Chairman of Leckford Estate and also Chair of the FACE Strategy Group thanked members for attending and for their continued support of FACE.

After a splendid lunch, tractor and trailer tours took place of the

estate and the private Longstock Park Water Gardens, combining agricultural information with horticultural beauty. And the sun came out for us!

If any member is interested in hosting a future FACE Annual meeting or any of our regular seminars, please do get in touch!

## What's Cooking?

The Co-operative farms hosted a FACE seminar at its Stoughton Estate. Farmer Nick Padwick and his wife Michelle have been integrating cooking activities into their popular school visits programme for some time and on this occasion they were joined by presenters from the Healthy Schools programme and the School Food Trust. The afternoon was both great fun and very informative as delegates set about tackling simple food activities that they can use with school groups.

## Farm Shop School Visits

HFG Farm Shop in Beeston, Norfolk was the location for another FACE seminar in the summer. These events aim to help FACE members learn from the experience of others and on this occasion Nick and Judy Taylor shared their expertise in planning and organising opportunities for school groups to visit their farm shop and to take part in educational activities on the site.

## FACE news

### University of Nebraska

In June 2010 four members of the University Department based in Lincoln, Nebraska, USA spent a week in the South East visiting farms, schools, farm shops, farmers' markets and a rural training centre. The visit was arranged by Meg Hart,

FACE regional coordinator for the South East, who accompanied the group on their fact finding visit about the FACE CEVAS programme for training farmers. The group learned about how we in Britain go about hosting visits, educating teachers and students about where their food comes from and what is required for a healthy diet and lifestyle.

### Student teachers learn about farming

Each year, FACE East Midlands Co-ordinator Bobbie Harvey leads a farms day for the final year undergraduate geography education students at Bishop Grosseteste

University College, Lincoln. The day is part of their subject leaders' module and aims to introduce them to farming education with a geography and cross-curricular focus.

Tutor John Halocha said: "The visit to Cote Hall Farm showed how valuable links can be made with specialist small farmers."

### Regional seminars

FACE and Farms For Schools are collaborating to offer regional seminars for their farmer members. The first took place on a cold day in Spring at Mount Pleasant School Farm which boasts a brand new sustainable building based on a working beef and dairy farm in Worcestershire.

The second event was held at award-winning Rushall Farm in Berkshire where delegates had a chance to see how the farm use

their resources when working with schools, including charcoal burning and river studies. Further joint events are planned near Cardiff and in Skipton, North Yorkshire. Keep an eye on the FACE website for details of future seminars!

### Kenilworth Show

In addition to 72 shows and events at which FACE team members can be found each year, for the first time FACE offered children's activities at the Kenilworth Show in July. Families were eager to take part, making their own models from natural items so that there was a permanent queue at the FACE marquee!

### Taste the Harvest

Staple Farm of Staple Fitzpaine, Taunton, Somerset, hosted a 2 day "Taste the Harvest" event which welcomed over 450 primary school children and their teachers from local Somerset schools.

The children gained practical experience in many farming and countryside skills. The Royal Navy and Marines set up a field kitchen and cooked the food that the children had prepared (Bread, Frittata and Fruit Crumble) and lunch was served in a huge marquee. After lunch the local vicar gave a mini Harvest Festival service.

FACE was present on both days providing comprehensive information to the schools with the aim of setting up future farm visits.

## FACE news

### The Farm Behind the Food

What do food assurance labels mean? How can pupils be challenged to question these labels and hence learn more about how our food is produced? This Defra-sponsored project has now resulted in a new website developed by FACE which highlights 50 classroom activities devised by teachers. Do take a look at [www.farmbehindthefood.org.uk](http://www.farmbehindthefood.org.uk)

### Teachers visit school farm

The FACE Teachers' Advisory group enjoyed a fascinating day visiting Edwalton Primary School in Nottingham. The Head, Brian Owens, is a member of the group and his school has its own farm run by the pupils. The children were proud to give guided tours of the farm and the woodland which are all used actively throughout the curriculum.

## FACE members' news

### Children visit Game Fair

In July twenty-five children from Heathfield Primary School in Birmingham visited the CLA Game Fair held at Ragley Hall, near Alcester, in Warwickshire.

The CLA Charitable Trust paid for the coach transport and tickets in a bid to encourage more CLA members to host educational visits

on their farms and estates. They also enlisted the help of the Ernest Cook Trust whose staff led some of the children on their tour of The CLA Game Fair.

Whilst at the Show the children got to grips with ferrets and working dogs and had the opportunity to milk a model cow. They also had lunch at the CLA Village, where they took part in a cookery demonstration and learnt about the importance of local food.

### Farms for City Children news

Children's charity, Farms for City Children is delighted to announce that renowned, Devon-based chef Michael Caines MBE has lent his support to the charity by agreeing to become a Vice President.

Helen Chaloner, Chief Executive of Farms for City Children said: "Michael Caines is a wonderful ambassador for our charity and a great role model for the thousands of city children that come and spend a week on our farms each year. As someone who has excelled

through dedication and hard work, he embodies our emphasis on purposeful work and getting a job done as part of a team." Michael has championed the importance of using seasonal, local produce and this chimes with what the children learn on our farms.

### Uses of a Sheep Fleece

A secondary school teacher contacted Hendre Ifan Goch Farm as her class was exploring natural textiles. As Prince Charles had just launched "The Prince's Wool project," she was keen to use wool. A fleece from the farm's Blue Face Leicester mule sheep was taken and attached to the teacher's own wooden sheep and then the pupils

clipped the wool and processed it. It was:

- spun to give yarn,
- woven to give cloth,
- felted and needle felted.

They used the farm's website as a resource in the classroom.

## FACE members' news

### Tree planting proves popular

Children from a North Warwickshire school dug out their wellies and spades to plant around 350 trees at the Heart of England Conference and Events Centre in Fillongley.

Head teacher Linda Weyman said it had been a fun morning and was a great way to take classroom learning outdoors. Philippa Truman, the Centre's educational ranger, said the pupils had really thrown themselves into the project with great enthusiasm.

Schools interested in taking advantage of the centre's educational programme which involves exploring mini-beast habitats, pond dipping and multi-sensory explorers should contact Philippa on 01676 540333 or email [education@heartofengland.co.uk](mailto:education@heartofengland.co.uk)

Stephen Hammon, managing director of Heart of England Conference and Events Centre, with the saplings that were planted.

### Busy bees

A group of children and teachers from Adderley village school in North Shropshire were welcomed to Dorrington Hall Farm at the end of last term.

They also took part in Wild About Plants "Bee Scene" survey developed as a result of concern about decreasing wildflower and bumblebee numbers. They quickly found 10 out of the 15 plant species identified as being an important nectar and pollen source for bees and were convinced that given a

little more time they might have found them all!

### Hampshire Country Learning

Hampshire Country Learning is part of the national charity The Country Trust, dedicated to helping all schoolchildren access the working countryside. Many visits are funded by agricultural show societies, keen for schoolchildren to learn about how their food is grown, and the countryside managed.

The North East Hants Agricultural Association (Alton Show) displayed work from five local schools which made repeat visits, to see the farming calendar progress and gain a greater understanding of the seasons.

The Alresford Show Society's project continues to grow with thirteen schools taking part this year. The school judged to have made the most use of their farm visits in their teaching and learning is awarded a spectacular trophy.

The New Forest National Park Authority's Sustainable Development Fund supported the project at The New Forest and Hampshire County Show. Schools displayed work produced following farm visits, growing projects and cookery workshops.

Such is the success of these partnerships it is certain that the Countryside Education Projects at the Agricultural Show Societies are set to continue into the future.

## FACE members' news

### Grow Your Own Potatoes

This year the Newbury and District Agricultural Society supported the Potato Council's "Grow Your Own Potato" project by inviting ten Primary Schools from across Berkshire to the Showground in March to plant up seed potatoes as

well as taking part in other activities to celebrate the humble spud. In June the schools returned to make potato salad, selecting from a variety of ingredients, before harvesting the crops grown back at school. The winners for the heaviest crop were Cold Ash St Marks Primary School and Hermitage Primary School which each won a set of gardening tools.

### Growing Well receives Local Food grant

Growing Well was delighted this summer to receive a Local Food award from the Big Lottery which will be used to inspire children and their families to grow food.

Schools have been visiting Growing Well and Low Sizergh Farm for the past four years but receiving this funding has enabled them to further develop the education work. Over the summer months 400 children have visited the farm and during the winter months the education team will be offering free food education

workshops to schools. Growing Well has recently received the Quality Badge for Learning Outside the classroom.

For information please contact [pauline@growingwell.co.uk](mailto:pauline@growingwell.co.uk) 015395 61777 or visit the web site [www.growingwell.co.uk](http://www.growingwell.co.uk)

### My Farming Life

FACE has been involved in a fascinating oral history project in North Warwickshire. A series of interviews about 20th century farming life has been collected, reflecting the many technological and social changes that affected farming.

New FACE member Warwickshire Rural Community Council recorded the interviews for the project My

Farming Life, funded by Heritage Lottery Fund.

The website is [www.myfarminglife.org](http://www.myfarminglife.org)

### Royal Norfolk Show 2010

6,364 School children visited the 2010 Royal Norfolk Show. The specially designed schools trails continue to provide an excellent opportunity for teachers to organise a fun educational day out at the Royal Norfolk Show. Trails are linked to the national curriculum and are available from reception class to Key Stage 4.

Comments from schools included: "It was a superb day; the trails gave the day a focus and purpose which added to the enjoyment of all."

The picture shows children shaping bread dough on the RNAA 'Over the Farmers' Hedge' stand.

## FACE members' news

### Countryside Live

The Countryside Foundation for Education runs Countryside Live events in West Yorkshire in May and East London in September. The East London event, run in partnership with Lee Valley Park Authority attracted 3000 primary school children.

A number of organisations attend the event and present hands-on practical learning experiences for the children introducing them to aspects of Countryside Management, Farming, Food, Conservation, Environment and Country Crafts. The central arena programme includes displays of sheep dogs, gundogs, falconry and ferret racing.

Teachers TV filmed at the event this year; view it at: <http://www.teachers.tv/news/76142>

Lee Valley Park Authority values this event so much that this year they opened it to the public over the following weekend. It was well attended, so it is hoped that members of the public can benefit from the event in years to come.

For further information [www.countryside-live.org.uk](http://www.countryside-live.org.uk) or email [gary-richardson@countrysidefoundation.org.uk](mailto:gary-richardson@countrysidefoundation.org.uk)

### Pasty kitchen

Nearly 1200 young visitors to the East of England Show 2010 took the opportunity to make a pasty.

Sandra Lauridsen of FACE partner organisation the East of England Agricultural Society, had drawn sponsorship from local farmers and food producers for the event. Working in a specially built kitchen, Sandra started each session explaining how the ingredients had been grown and demonstrating how to make the pasty. Strict hygiene and health and safety arrangements were in place.

After much rolling and crimping the pasties – suitably numbered so they could be returned to the right child – went into the ovens.

While they cooked, members of the FACE team helped the young chefs find out more about how the ingredients were grown and helped make a giant mural. 20 minutes later the tasty pasties, now in special boxes, went home with their creators – how far they got before being sampled is uncertain!

### 'Food and The Garden' Day

Growing and eating your own food was the focus of a special day attended by sixty primary school children at West Dean Gardens. The day was organised by Sarah Stewart, Education Officer for the West Sussex Countryside Studies Trust, in conjunction with the Gardens.

The Key Stage 2 children spent the day learning about growing and cooking food through various workshops and also had the chance to explore the walled gardens and other parts of the West Dean Estate. Sarah Wain, Gardens Supervisor, led a hands-on session looking at compost and cultivation, sowing seeds and harvesting vegetables.

In the newly converted Old Dairy at West Dean, venue for the new food courses launched earlier this year, local cookery expert Rosemary Moon demonstrated simple recipes incorporating seasonal home-grown produce, followed by tastings.

## FACE members' news

### Apple activities

At Pympe Court Farm when the fruit harvest was underway, the Farm Centre, too, was busy with groups of children on a "Fruit Foray," a great opportunity to learn about growing food on an English farm.

The children were told about planting trees and played movement games where they stretched tall as standard trees and then crouched down to be dwarf trees. Each child was then given a bag and allowed time to pick 3 cooking apples to take home.

On the way back, there was a lively game in the field about the importance of trees to the environment and for the protection of wildlife. Then, back to the packing shed and time to do some apple grading. The youngsters were shown how to size the fruit, and then spent a busy few minutes packing boxes.

The visit ended with apple tasting: 3 different varieties of eating apple were tasted, and then the children had to vote for the one they liked best!

### In one end, out the udder

The Institute for Animal Health was invited to the Moreton-in-Marsh Show, Gloucestershire. Kids and adults alike were encouraged to get their hands into cow foods (silage, cereals, alfalfa etc.), which some did with more relish than others, then have a go lifting a milk cluster up to one of our life-size model cows. Others sat on a stool to do some 'milking'. The rather sophisticated milk-able cow was unavailable; the kids were just as happy with a simple flat one, with udders hanging down from a plastic container. Children's white powder paint dissolved in water took the place of milk, to avoid concerns if children were sensitive to milk. They also got to look at bacteria that had been isolated from the feet/hands of cats, dogs and people.

### Every Chicken Matters

High animal welfare standards, how to look after chickens in a school setting and how to afford higher welfare chicken in schools meals are just a few of the things that school staff learned during an event held by the Food for Life Partnership at FAI farm, Oxford which is at the forefront of animal welfare research.

School staff heard from FACE and the Country Trust about farm visits.

The event involved practical hands on sessions with caterers, farmers and of course chickens. For further information contact Jo Edney [jedney@soilassociation.org](mailto:jedney@soilassociation.org)

### Rothamsted Primary Science Group

For ten years, Rothamsted Research has been engaging with primary schools through the Rothamsted Primary Science Group. An annual programme of activities is developed

in partnership with teachers.

A very popular activity is the 'mini-beast' safari, a lively introduction to studying wildlife, habitats and biodiversity. In the Autumn term, the 'fungus foray' is an excellent way of introducing the key scientific skill of observation as well presenting to children the important roles that fungi play in

the environment. Rothamsted scientists visit schools to speak about how crops become food.

In recent years, the group worked with around 1000 children per year and aims to change stereotypic perceptions of science and scientists, in particular related to agricultural areas. For more information, visit: <http://www.rothamsted.ac.uk/schools>.

## FACE members' news

### Project Olympic Games 2010

The long summer break from school presented no problem for the staff and children at Fairfield Residential Home which works on a farm project with Ian Daniel from Higher Thorns Green Farm, Cheshire. The project is for young people with

Autism, Learning Disabilities and behaviours that challenge. The staff devised a diverse programme of games and events, and the children worked hard producing posters, and banners for the events, as well as making the competitors' medals.

The children took part in up to ten events culminating in a grand final, picnic and presentation day. The

egg and spoon race was particularly competitive – where the children used painted hard boiled eggs from the farm's own chickens.

## News from land based colleges

### Countryside Live at Sparsholt College

Over one thousand children had a taste of the country when they attended the fifth annual Countryside Live at Sparsholt College. The 13 and 14 year olds from schools across Hampshire spent the day experiencing the

many and varied activities at Sparsholt whilst also exploring roles and careers in the countryside.

### Young City Farmers Programme 2010

The summer has been hectic for ten teenagers from urban (disadvantaged) backgrounds, who spent two weeks immersed in food and farming at the Royal Agricultural College (RAC), Cirencester. The Young City Farmers (YCF) programme provides an intense, practical learning experience in which participants are involved in food and farming processes; rural skills acquisition; environment, conservation & sustainability; agricultural and animal science, and personal key skills.

All students were adamant that food and farming would feature in their future career plans.

### Celebrity botanist backs Reaseheath's inspirational teaching

Internationally acclaimed botanist and natural historian David Bellamy OBE was at Reaseheath College, Cheshire to open an animal management training centre which includes specialist rooms for reptiles, amphibians and fish, accommodation for domestic animals, teaching and meeting rooms and an impressive entrance to the college's zoo. Earlier he had met up with 30

pupils from the reception class of a local primary school who had been enjoying a day on campus looking at plants and animals. To illustrate how a caterpillar walks, David, 77, joined the children on his hands and knees and then answered a barrage of questions.

## News from land based colleges

### Education Enchilada

In a series of "Education Enchilada" days, the Royal Agricultural College (Cirencester) shared the importance of education, food and health with Year Six pupils, who were amazed by their enchilada creations and enjoyed a healthy meal using fresh ingredients from the local area and the on-site allotments all wrapped up in a scrumptious tortilla. The children, from local primary schools, spent the day on campus learning about healthy diets and what each

nutritional element of a balanced plate helps our bodies to do – whether it's learning, playing, growing or repairing.

One teacher commented, "Anything that gets students excited or enthusiastic about health is definitely a positive step".

### Animal magic

Kingston Maurward College celebrated the start of its second year with a Learning Outside the Classroom Quality Badge (LOtC). Under the LOtC, more than 1,800 primary schoolchildren across Dorset have visited the land-based college during the past year to learn first hand about animals, food production and agriculture.

The children can visit the college's Farm Park to see how animals are cared for, do arts or do planting activities. The sessions are tailored to the needs of each school.

### Broomfield Hall Food Hub To Open

Derby College is opening a new Food Hub at Broomfield Hall in Morley in October to help local people to learn how to grow their own produce as well as helping current local producers to sell their own produce.

Head of Broomfield Hall Louise Curd said: "The Food Hub has

various different aspects which share the common theme of encouraging and supporting local people of all ages and from a range of cultural backgrounds to grow and make their own produce. We will be working closely with community growing schemes and local schools as well as setting up short training courses to inspire and upskill people to join this growing trend."

For more information, please contact Derby College on 01332 520200 ext 6618

### Summer Nature Days

Moulton College's Countryside Education Centre hosted Summer Nature Days which attracted families who enjoyed outdoor activities including pond-dipping, den building and woodland art.

The centre also holds an annual Seed Hunt in October, Tree Dressing in December and a

Woodland Easter Egg Hunt. For more information please email Beckip@moulton.ac.uk.

### OctoberFeast

Plumpton College worked with schools and local farms and food producers to prepare displays for shop windows in Lewes to show the pupils' interpretations of local, seasonal and sustainable foods. During the project, the college helped the children to understand carbon footprints.
